

MS 3000

SUCTION IRRIGATION PUMP

Made in Germany

MS 3000

Suction Irrigation pump
for all surgical applications

- high flow system with 3 liters/minute
- filter system for sterility
- full automatic, no adjustments required
- stand-by function for noise and wear decrease

MS 3000

The **MS 3000** is a powerful suction and irrigation pump for all surgical applications. The system works fully automatic. During the work, no adjustments are necessary. Overpressure in the irrigation bottle and underpressure in the suction bottle are controlled and balanced by high sensitive electronical sensors.

The automatic stand-by function keeps the pressures available and reduces the noise if the system is not used.

The use of disposable sterile air filters avoids contamination of the **MS 3000** and the irrigation liquid by contaminated air.

All accessories like tubes, suction bottle and puncture tube are full autoclavable.

The **MS 3000** is very simple to install and easy to use.

TECHNICAL DATA

Power supply	115 VAC / 230 VAC switchable
Irrigation	max. 3000 ml/min (1)
Suction	max. 3000 ml/min (1)
Dimensions (WxHxD)	353 x 105 x 253 mm
Weight	ca. 4,5 kg
Class / Type	2a/ BF
Manufactured and tested acc.	IEC 601-1 / CE ₀₁₂₄ EN 60601-1 93/42 ECC

(1) depending on tube set and instrument

Delivery contains

MS 3000
2 liter suction bottle with holder
2 Sterile filter
1 Silicone tube set for suction
1 Silicone tube set for irrigation
1 Puncture tube for rinsing bottle
